Copy of D.O. from L.C.Pais, B.A., B.L., Vice-Chairman, M.C.-in-charge, Mangalore to T.G. Rutherford Esq., C.S.I., C.I.E., I.C.S., Third Adviser to H.E. the Governor, dated 3rd June 1941.

...

Your D.O. dated the 27th May 1941.

It has given us immense pleasure to learn that you are visiting Mangalore. The Members of the Municipal Council would be very happy to meet you at 8.30 P.M. on 16th June 1941 at the Municipal Office and discuss the following subjects:--

1. Extension of Municipal limits - The Government declined the proposals in G.O.No.Ms. 3021 L.A. dated the 23rd August 1940. The Council was considering the question of sending a small deput tion to wait on you.

2. Protected water supply scheme - The council is levying water tax from 1st April 1941 as advised in G.O.No.Ms. 2934 P.H. dated the 3rd July 1940. Government have been requested in this office letter No.C2-4906/41, dated the 14th May 1941 to expedite the preparation of the scheme.

3. Appointment of Engineer.-- In G.O.No. 842 L.A. dated the 25th March 1941, Government have ordered the appointment of a II Grade Engineer. A III Grade Engineer would be sufficient in view of the present financial position of the Municipality at any rate till the water supply scheme is executed.

4. Profession tax - The proposed limiting of profession tax to Rs.25/- per half year would affect the finances of the Council. The Central Government should grant compensation from the income tax proceeds.

I trust you would have no objection to any other subject also being brought up.

Secretary L.A. Please get me any files necessary.

Water Supply.

The Mangalore Municipality has at present no protected water supply Scheme. On an inspection of the place, the Sany. Supvr: recommended what is called the Hassaman Valley Scheme. This source was expected ordinarily to give a supply ~~of~~ of Six gallons per head per day for a ~~prospective~~ population of 60,000. The municipal council considered that this would not meet the growing needs of the town. A supplemental scheme has therefore to be chalked out. The Sany. Engr. has recommend

4

supply of water from the Gurpur river (to supplement the supply from Hassamar).

The cost of the two schemes (main and supplemental) is as follows: —

	Main Scheme (Hassamar valley)	Supplemental Scheme (Gurpur river)
	Rs	Rs
1. Investigation	700*	4,300
2 Installation	9,00,000	5,09,000
3. Maintenance	4,500	19,500

*para 6(V) of j 12 (C)

The total cost of both the schemes works out to Rs 5000 for investigation, Rs 14 lakhs for installation and Rs 24,000 for maintenance.

2 The municipal Council has agreed to place the sum of Rs 5,000 required for investigation at the disposal of the Sanitary Engr:, and has actually placed the sum of ~~Rs~~ 700 at his disposal for the investigation of the main scheme (Hassamar Scheme)

(C) 18

(C) 20;55

The Commr. has reported that a provision of Rs 4,300 required for the investigation of the supplemental scheme has been included in the municipal Council's budget for the current year.

3 On an examination of the financial position of the Council, it was found that the council should levy water and drainage tax at 6 p.c. p.a. for the main scheme and to raise it by 2 p.c. more for the supplemental scheme. The Council has since resolved to levy the tax at 2 p.c. from 1-4-41 in respect of the main scheme.

4. In Govt. No 2936 PH dt: 3-7-40 the Govt. have sanctioned the preparation of plans and estimates in the case of the main scheme (Hasdamar valley Scheme) and have also directed that the investigation of the supplemental

Scheme (Gurpur river Scheme) should be taken up, after the municipal Council has placed the necessary funds for the investigation at the disposal of the Secy Engr.

S The investigation report and plans and estimates are awaited, ~~for~~ in respect of the main scheme. As regards the investigation of supplemental scheme, funds have yet to be placed by the Council at the disposal of the Secy Engr.

Ch

SA
11.6.41
S

Is this scheme on the priority list? If it is does this mean that the work can be put in hand as soon as plans and estimates are sanctioned?

Your note might have been fuller in view of the impending change in S when it was written.

AW
15-6

A.S. (Ed?)

Submitted that this scheme has not been assigned a place in the priority list recently approved by Govt. As the investigation is not yet complete it was included by office in list III, i.e.

list of schemes which have not been investigated. The Secretary (Mr.E.C.Wood),however, selected only a few schemes from the list and left out the others for the reason that they were not likely to be taken up soon.

2. If the scheme is included in the priority list, the Sanitary Engineer will take up the investigation and the preparation of plans and estimates after the other schemes placed above it have been dealt with. The work can be put in hand only after the plans and estimates have been prepared and after the Government sanction the necessary grant and loan and provision is made for the grant and the loan in the budget. The question of giving grants for individual schemes is dealt with as a Part II scheme for the budget. If investigation is completed and plans and estimates are ready in the present case by 1st October, the question of grant can be considered in connection with the budget for 1942-43 with reference to the relative urgency of other schemes that are also ready for consideration .

In this connection the question whether a work should be taken up for execution will also have to be considered with reference to the need for economy in the use of steel and iron in the present conditions. In these circumstances,it is doubtful if the scheme could be taken up for execution next year even if the Sanitary Engineer is in a position to complete the investigation and get the plans and estimates ready this year.

S/4
17.6.41

A copy of the priority list (No 2474 PH d: 13.6.41) and a copy of the Secy's (Re wages) note, referred to in the margin on the previous page, are put up - (J) and (T); and the case is submitted for orders.

25/6 If it is considered that a place should be given for this scheme in the priority list, the particulars furnished by the D.P.H in this list (A) may be referred to. No 64 on page 9 of that list refers to Mangalore.

SA
25-6-41

I think we should stick to our priority list in order to avoid disrupting the energies of the Sanitary Engineer and his staff.

DPH's list at (A) gives reasons why practically every scheme should be taken up at once.

What we really want from

DPH is a statement (or better graphs) showing the incidence of all water borne diseases over a period of 10 years with a 10 year average.

If this ~~was~~ was furnished as well as the Presidency statistics of incidence we could more easily ~~determine~~ say where the need for protected supplies was most acute.

I suggest that ~~the~~ investigation of this scheme be dropped for the present.

When a scheme in Class III of the list goes on to class II the claims of this and other schemes for inclusion in class III may be considered.

Water supply and drainage.

× × ×

2. A sum of Rs. 700/- was paid to Government on 15th August 1939, for the investigation of the scheme and for preparing the final estimates and plans for the execution of the scheme. The investigation has been sanctioned by Government in their order No. 2934 dated the 3rd July 1940. The Municipal Council has begun to collect water tax as from 1-4-1941 at 1 per cent of the annual value per half year. The decision of the Municipal Council on the above G.O. was communicated to Government in this office letter 7868 C2/40 dated the 12th August 1940 and no action appears to have been taken till date.

H.E.'s A.'s Minute ---

2. The Council seems to be unaware of the fact that the Sanitary Engineer has definitely been ordered to prepare plans and estimates about the water supply scheme and nobody of his staff has so far appeared on the scene. They quote G.O.No. 2934 merely as sanctioning investigation. As the G.O. was not in the file, I was unable to check this. I think the Sanitary Engineer should be asked what he is doing about this. The Council authorities say that difficulty about procuring pipes need not hold up work as the first part of the work is the construction of the reservoir.

Memorandum No.22294-2-E2-P.H. dated 16th July 1941.

From the Commissioner, Mangalore Municipality, C-2-4906/41, dated 14th June 1941.

Water Supply - Mangalore Municipality - Investigation etc.

The Commissioner, Mangalore Municipality, is informed that in view of the large number of water supply and drainage schemes, for which plans and estimates are required the Government have been obliged to issue instructions to the Sanitary Engineer that the schemes for the towns in which the need is greater should be taken up first. In this connection the Government have ordered that preference should be given to a number of places whose needs are more urgent than those of Mangalore and the investigation and preparation of plans and estimates for the Water Supply scheme of the Municipality must be deferred for the present.

E.C.Wood,
Secretary to Government.

WATER SUPPLY AND DRAINAGE SCHEME - Mangalore ---- Municipality - Investigation and preparation of plans, etc. - Report submitted.

Memorandum No. 22294-2-E2; Public Health, dated the 16th July 1942. 1941

******

In the above memorandum, the Commissioner, Mangalore Municipality, was informed that the investigation -- and preparation of plans and estimates for water-supply -- scheme of the Mangalore Municipality would be deferred -- for the present in view of the fact that preference was to be given to a number of places where needs were more urgent than those of Mangalore. The Special Committee appointed by the Municipal Council with reference to the above order met me in an interview to explain the urgency of the scheme of the Mangalore Municipality. In this -- connection, the Municipal Health Officer, Mangalore, has furnished statistics showing deaths from water-borne --- diseases within the Municipal area since 1932. I enclose herewith a copy of the statement showing these statistics which would show that there has been increase of deaths from the above diseases in the Mangalore Municipality. I am of opinion that there is a good case for enhancing the priority ϕ for the water supply scheme of this ---- Municipality.

For Collector.

25 JAN 1944

Sir,

Subject: Water-supply scheme for Mangalore Municipality - Revising of priority list.

In G.O.No. MS 2371 P.H., dated the 1st August 1943, Government had informed this council that the question of giving preference to this Municipality with regard to the water-supply and drainage schemes would be considered when the priority list is next revised. The Sanitary Engineer to Government who was addressed in the matter writes that the priority list has not as yet been revised and that it is also not known when the revised list would be issued. The Council feels that the schemes should be taken up as early as possible since typhoid is endemic here while filariasis is wide spread. In reviewing the administration report of this Municipality for 1941-42, the Government have asked the council to take active steps to combat filarial endemicity. It is common knowledge that without a proper water supply and drainage scheme it is not possible to bring the diseases under effective check. The Municipality is already levying water supply and drainage tax.

When His Excellency the Governor of Madras visited this Town last in connexion with War effort the council, in a civic address presented to His Excellency, took occasion to stress the need for a water supply and drainage scheme for Mangalore whereupon His Excellency was pleased to assure the Council in his reply that he would see that Mangalore attained as high a place as possible in the priority list. In view of this declaration and having regard to the fact that on account of the recent extension of Municipal limits towards the end of the last official year the town has grown in stature and importance, attaining, in fact, the status of a City with a population of one lakh, and with its improvements in other directions like town-planning not to speak of its accentuation of the natural advantages of its lay out and contours of landscape which has made it the growing home of highly educated, cultured, and advanced citizens who will not be satisfied with anything but what the latest discovery of science and engineering could afford them, thus placing itself undeniably above the other mofussil towns, the council in its resolution No.6 dated the 20th December 1943, has passed a resolution requesting Government to take up the question of revising the priority list. I request that Government may be pleased to pass necessary orders in the matter giving this Municipality the foremost place in the list.

A copy of Council resolution No.6, dated 20th December 1943 is enclosed.

20.1.44
COMMISSIONER.

years. Appointments under emergency powers and an extension of such appointments, if necessary, are the only course available.

4. I, therefore, request Government's authority to make such appointments when necessary, without it being considered as evasion of the rules.

I have the honour to be,

Sir,

Your most obedient servant,

20.12.40

for Director of Public Instruction.
